

Microsense
An iBUS Enterprise

Experience the Power of Connectivity with Microsense

Microsense, an iBUS enterprise, is a trusted provider of enterprise-grade managed Wi-Fi and digital connectivity solutions for hospitality, education, retail, co-living, co-working, healthcare, and corporate environments.

Trusted by enterprises since 1982, Microsense delivers secure, high-performance networks designed to enhance user experience and operational efficiency.

As a licensed Class A ISP and Asia's first OpenRoaming-certified company, we offer end-to-end managed Wi-Fi and casting solutions built for scale, density, and seamless mobility.

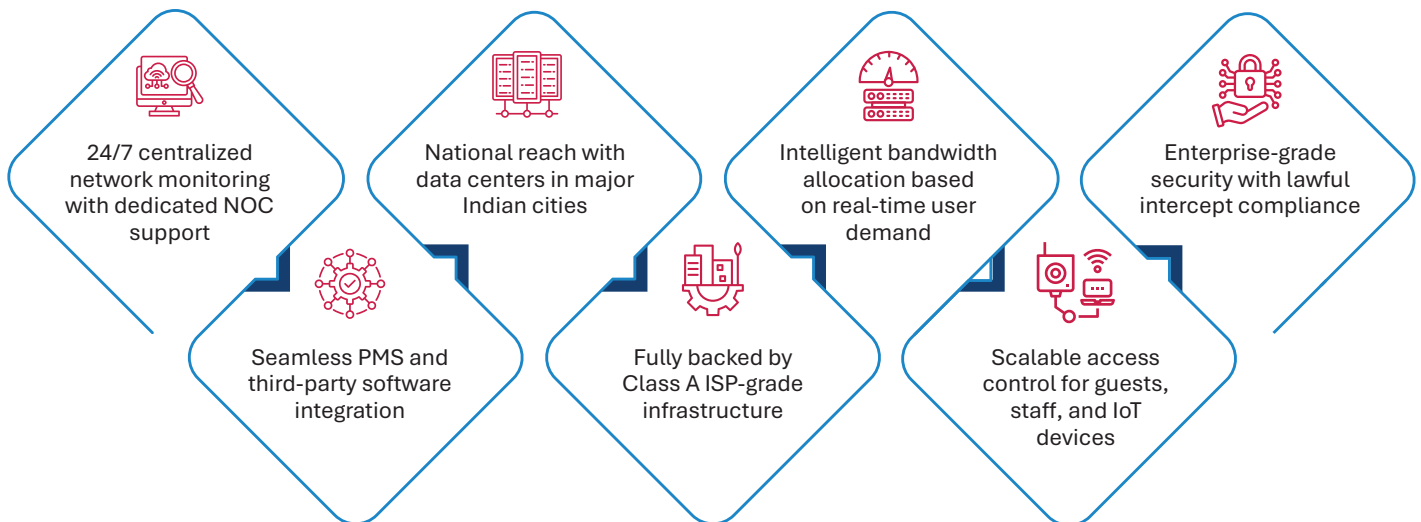

India's No. 1 Managed Wi-Fi Provider for Hospitality

 <p>40+ years of enterprise Wi-Fi experience</p>	 <p>90,000+ access points deployed across India</p>
 <p>Serving 70,000+ rooms and 60,000+ students</p>	 <p>Trusted presence in 70+ cities</p>

No CapEx. No Complexity. Just Fully Managed Enterprise Wi-Fi.

Managed Wi-Fi Services

Built for modern enterprises and high-density environments to ensure seamless, secure, and scalable connectivity

Cloud Wi-Fi

A unified cloud platform to deploy, migrate, and manage network infrastructure with 360-degree visibility

- ✓ Plug-and-play deployment with minimal setup overhead
- ✓ Cloud-based asset management with 24/7 monitoring
- ✓ Secure authentication with GDPR-compliant data handling
- ✓ Real-time analytics on user behavior, location, and network usage

High-Speed Internet Access (HSIA)

Robust Wi-Fi infrastructure with advanced bandwidth management and a true plug-and-play experience for guests

- ✓ Supports enterprise VPN, SMTP, proxy, and definable access policies
- ✓ End-to-end connectivity with internet leased line provisioning
- ✓ Secure authentication with GDPR-compliant data handling

Secure Wi-Fi

Enterprise-grade security and access control to protect users, devices, and data across your entire network

- ✓ 802.1X policy-based authentication with secure onboarding
- ✓ One-time login experience to reduce credential fatigue
- ✓ Centralized user management with custom access policies
- ✓ Threat protection against malware, phishing, and harmful websites

Guest Room Entertainment (GRE)

Personalized in-room experience with Google-certified casting for private, app-free streaming

- ✓ Secure, QR-based casting from guests' personal devices
- ✓ Guaranteed privacy with no cross-room interference
- ✓ Centralized content and channel management for hotel teams
- ✓ PMS integration for smoother communication and service delivery
- ✓ On-screen access to dining menus, spa details, and hotel services
